done.
```

Gave up waiting for root file system device. Common problems:

- Boot args (cat /proc/cmdline)
- Check rootdelay= (did the system wait long enough?)
- Missing modules (cat /proc/modules; ls /dev)

ALERT! UID=943003e9-f11c-4643-822a-546fc4267b30 does not exist. Dropping to a shell!
